Siberian Kale,
Lettuce,
Mustard,
Winter Radish,
Spinach,
Turnip.

TO OUR FRIENDS AND PATRONS.

After nearly a quarter of a century of continuous active business in the Seed Trade, etc., I have retired from the same for rest. My successor, Mr. F. H. Ebeling, who was associated in business with me for nearly ten years will continue the same in all its departments, and I would ask for him a continuance of your patronage, feeling confident that all matters placed in his hands will receive prompt and careful attention as heretofore.

My private office in the future will be at the "old stand" as usual.

Yours truly,

A. D. PERRY.

Frederick H. Ebeling, who for nearly ten years was the partner in the firm of A. D. Perry & Co., will continue the business in all its departments in the same substantial and conservative manner as heretofore, at the old stand, under the well known name of its founder, "*The Perry Seed Store.*"

All business entrusted to his care will receive prompt and careful attention.

Yours Respectfully,

The Perry Seed Store,

F. H. EBELING, Prop'r.

Es macht uns große Freude unseren deutschen Freunden und Kunden unseren jährlichen Catalogue für 1893 vorzulegen.

Derselbe enthält eine vollkommene Liste der auserlesensten Sorten frischer Garten-, Feld- und Blumen-Samen, von den besten und erfahrensten Kunst-Gärtnern in diesem Lande und in Europa mit der größten Sorgfalt für unser Geschäft besonders auserlesen. Weiter, allerlei Gartengeräthe, „Lawn Mowers," Maschinen und Werkzeuge aller Art, Blumentöpfe aller möglichen Sorten und Preise—kurz, alles was im Garten und auf dem Felde gebraucht wird. Die vieljährige Erfahrung im Samengeschäfte macht es uns möglich unsere Kunden prompt und auf's Beste zu bedienen. Herr Ebeling, jetzt die Firma, wird es sich mit Freuden zur Aufgabe machen, allen deutschen Kunden in ihrer Muttersprache zu bedienen, und es wird sein Bestreben sein durch freundliche Bedienung ihre Kundschaft und Wohlwollen zu erwerben und zu behalten.

Der Perry Samen-Laden,

F. H. Ebeling, Eigenthümer,

217 Warren Straße, Syracuse, N. Y., Dem neuen Post-Gebäude gegenüber.

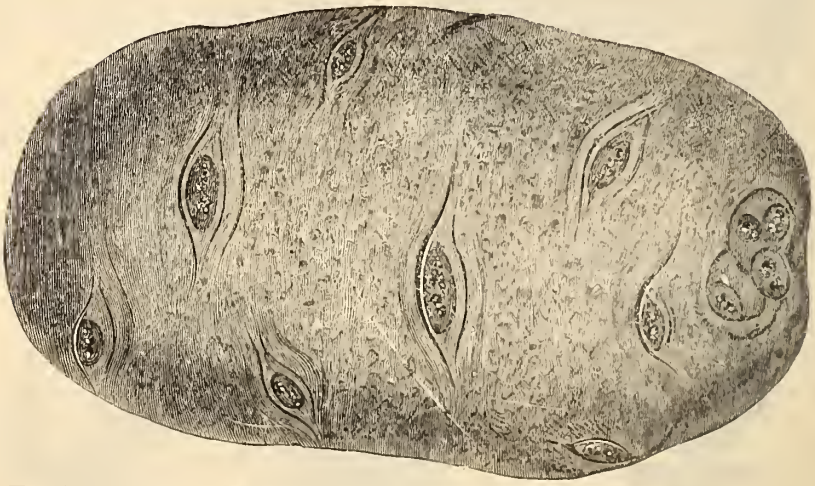
New Mammoth Cucumber.

Our Mammoth Green Spine is a new Hybrid of the White Spine and Long Green; we would recommend it as the best Cucumber known for Green House culture; it has the appearance and shape of the Long Green and will grow from eight to twelve inches in length, retaining its shape, green color and fine table qualities. It is medium early, small core and few seeds. For out-door culture it cannot be excelled, being very hardy, not subject to rust, will retain its vitality through the entire season, will not become bitter by remaining on the vines, and is a great yielder. We offer this year a limited quantity only, in packets, **25 cents each.**

This makes one of the most valuable market Cucumbers known, as its size recommends it to the purchaser, who once knowing its value calls for it ever after and will have it if obtainable in preference to any other sort. These are plain dollar and cent facts which we can vouch for. *Size and quality* carries it to the front.

OHIO JUNIOR.



The Earliest and Most Desirable Potato for Market Gardeners.

Ohio Junior, although a chance seedling, is without doubt in some way related to that good old sort, the "Early Ohio," as it is almost identical with that variety in form and marking of tubers, habit of growth, etc.; probably the first and only instance where the "Ohio" has been re-produced from seed. The tubers are oval-oblong, round at the seed end, with full eyes that are almost even with the surface. It is an excellent keeper, of fine quality, a large yielder, for an extra early variety, this is the earliest of fifty kinds grown last season. We will book orders for a limited stock.

TRUE ERFURT CAULIFLOWER.

CHOICE CAULIFLOWER SEED.

This we import always from the same growers and for several years have not had one failure. It will produce a greater number of perfect heads than any other strain of cauliflower we ever saw. Of all the varieties that have been tried in this market *our strain of Erfurt has given the best satisfaction.* We have our usual stock of **Perry's Erfurt,** also **Long Island Beauty, Snowball, Denmark** and **½ Early Paris.** For prices see our list, page 3. We assure you the quality is always the same and no cheap seed offered you in its place. There is no better cauliflower seed in the market even if you pay fancy prices for others. Our price is **$3.00** per oz.

THE EARLY STANTON BEAN.

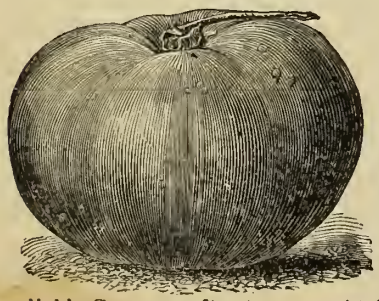
A pure white Bean with green pod, and the earliest of all in this market.

Many years ago Rufus Stanton brought to this county a medium size kidney-shaped White Bean which proved, after careful comparison, to be the *earliest* bean in the market. This bean has been preferred on account of its advantages over other early varieties.

1. It is very early, and fine as a string bean.
2. After they are too old for String Beans they are large and fine for shell or succotash.
3. It is pure white, kidney shaped, and when dry is very desirable for baked beans, with flavor and quality equal to Marrowfat.
4. Its habit of growth is very dwarf, erect, and the beans usually ripen all together.

We have a fine stock of Stanton beans to offer this season and are confident they will please the farmer and market gardener alike on account of their extreme earliness. They can be planted *very late after other crops fail.* They are also very productive. They are also a fine market bean dry. Price per quart 30 cents; ½ bushel $1.75; ½ bushel $3.00; bushel $5.00. If by mail add 15 cents per quart for postage.

SCOVILLE'S HYBRID TOMATO.



Is a very popular variety where known. For years we have handled the **seeds** and **plants** of this Tomato and the sale has extended to every part of the United States and Canada. We have now only a limited supply of **Scoville's Hybrid Tomato** seed for the trade. We expect however for our home trade a fine lot of **plants** grown by the originator, Mr. Scoville. This is the best variety for family use we know of, and we can recommend it.

As a Canning Tomato the SCOVILLE'S HYBRID has no superior. The following from our well known townsmen and old reliable Canners, after two years' trial *proves this true.*

Dear Sir:—We have handled and used in our Canning for several seasons a large quantity of SCOVILLE HYBRID TOMATOES, and we have no hesitation in saying that they have given us better satisfaction than any Tomato we have ever used.

1. They are solid, producing less water in the can. 2. The *Core* of this Tomato is dark colored. 3. They are uniform, good size and smooth, weighing more than the measured bushel. 4. Very fine flavored—not so sour as many varieties; all good qualities for us, and we commend them to all canners.

Yours truly, MERRILL & SOULE.

"SOU" FODDER.

Corn for Fodder, Ensilage, &c.

Our stock of Fodder corn is complete. Our **"Sou"** Fodder corn is from our agent, who picks up our stock early from the best crops grown. Our prices will be as low as the lowest.

LEAMING CORN.

This popular and distinct variety of yellow dent corn certainly has, beyond question, reached the grandest success of any yellow dent corn that has ever been brought before the American public. This corn is too well known to enter into a detailed description of its merits here, suffice to say: That it is a very uniform, medium-sized, very early, (maturing in 90 to 115 days), very heavy, long eared corn, with stalk growing medium tall, and very thick and strong. Our farmers were very successful last season. The sale will be much increased in the future for Ensilage.

Bushnell's Red Cob Ensilage Corn has gained a world wide reputation. It grows similar to other western and southern corn, very tall heavy stalks, and is grown extensively in Illinois and Missouri. It is too late to ripen in this state but being a rapid grower will produce many tons per acre.

The Pride of the North, By selecting and being grown for many years in Northern Wisconsin, has become quite distinct and is now about ten days earlier than the Leaming and grows two feet less stalk. We carry stock of the PRIDE CORN, and although not prepared to name price now, we will always supply you at low market price.

We have Sweet Corn for ensilage purposes which we can sell at a very reasonable price.

Field Corn. We have a fine stock of White Canada Flint, Angel of Midnight, Early Smut Nose and other varieties, in traces and shelled.

BURPEE'S BUSH LIMA BEAN.

The most remarkable of New Vegetables.

The bushes grow 18 to 22 inches high, of stout growth, always erect, and yet branching so vigorously that each plant develops into a magnificent circular bush, from two to three feet in diameter. It is an immense yielder, each bush bearing from 50 to 200 of the handsome, large pods, well-filled with large beans, identical in size, and luclous flavor to the well-known Large Pole Limas.

CULTURE.—Be careful, in planting, to push the Bean into the soil with the eye down; for as the leaves are quite large and heavy, it sustains them materially in breaking through the soil to plant them in this manner. Cover about 1 inch deep. Be careful not to plant until after danger of frost is over and the soil has become warm, in this latitude, about the middle of May. They succeeded best in sandy loam enriched with rich, light, well-rotted compost thoroughly incorporated. It can be had earlier if grown in frames and transplanted. Plant in rows three feet apart and fully two feet between the plants. The only bush form of the true large Lima Bean.

WE OFFER A NEW WAX BEAN

This season, grown and sent out by W. H. GRINNELL, of Pierrepont Manor, N. Y., one of the most reliable seed growers in Northern New York. Of this new Wax Bean he says: "I consider this bean the earliest, most productive and decidedly more **free from rust** than any other variety of Wax Beans." We would recommend a trial of this Bean in every market garden.

THE BERGEN FLEETWING.

A fine, extra early new variety of Pea, growing 16 to 20 inches in height, as *early as the earliest*. Pods 2 to 2½ inches long and fat like a Premium Gem, yields better than "First and Best," almost entirely free from runners. This is a variety we can recommend, being introduced by one of the most reliable and experienced growers known to the trade.

Disclaimer on Seeds.

We exercise the greatest care to have all Seeds pure and reliable. We do not give any warranty express or implied. If the purchaser does not accept the Seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

FALL BULBS.

HYACINTHS.

Double Dark Red Rose, Double Yellow, Single and Double mixed,
" Blue in shades, Single Red Rose, Roman Hyacinths, all colors.
" Pure White, Blue in shades, " " Pure White.

Culture.—If in glasses, the water should never cover the bulb, only just touching the base or root part of the bulb, and kept up to this point by replacing daily if necessary.

If in jars, they should be five to seven inch pots, filled with a rich sandy soil, and the bulb placed just out of sight in the earth. Wet thoroughly at first and keep moist in a cool dark place until well rooted, which you can tell by turning the jar up-side down on your hand and see if the roots show through the dirt. Three or four bulbs can be grown in one seven inch pot.

TULIPS, FINEST MIXED.

Single, Duc van Tholl, Red and Yellow, Duc van Tholl, Vermillion.
Double, " " Gold stripped, " " Yellow,
Parrot Tulip, " " Scarlet, Peacock Feather.

Mode of culture same as Hyacinths. If fine display is wanted, plant about four inches apart. If in pots three can be planted in one six inch pot.

POLYANTHUS NARCISSUS.

Poeticus, single, Trumpet Major, Double Narcissus.

Iris, mixed colors "Kaempferi."

All Iris are for open ground. Should be planted in the Fall as early as possible as the bulbs keep very badly out of the ground. Set the bulbs in clumps two inches apart each way and three inches deep.

CROCUS.

Best mixed variety, Blue, mixed shades, Striped, White.

CHINESE SACRED LILIES.

One of the most showy and quick growing house plants in cultivation, grows with little care in water or earth, and blooms freely. If you wish to grow them in water place the bulb in a dish so that when filled, the water will nearly or quite cover the bulb; place the stones around so as to hold it in position. Add fresh water every day, first removing as much as you can with a sponge. Time of planting from September to January.

Price, 20 cents each. Per dozen $1.75. By mail 25 cents each.

JONQUILS—Single and Double.

Lilies should be planted as soon as possible after being removed from the earth to assure blooms the coming season.

Lilium Auratum, large bulbs, Lilium Harrasi, large bulbs, Lilium Candidum.

ORNAMENTAL GRASSES, &c.

Sheaves of Wheat standing, three sizes.....50 cts., 75 cts., $1.00
Flat Sheaves, three sizes.....40 cts., 60 cts. and 75 cts.
French Moss, per full size package.....15 cts. each.
Immortelles all colors for Florists' work.....45 cts. each.
Plant Food, per package.....25 cts.

PERRY'S HYBRID SUGAR CORN

Is acknowledged by all seedsmen to be the best and largest second early corn in use.

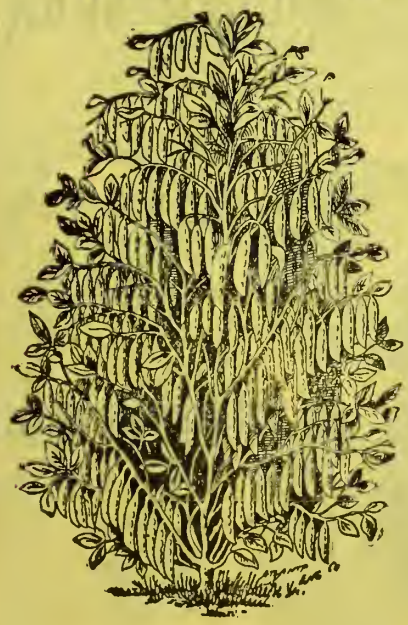
Jas. J. H. Gregory & Son, of Marblehead, Mass., recommend it for *second* early and says; **Perry's Hybrid** has proved to be very early, and a remarkably large-eared sort for one so early. Also note the verdict of all the leading seedsmen and gardeners who have tried it and have found it without an equal. We have a fine stock of it and price reasonable.

NEW SWEET CORN,

BURBANK'S EARLY MAINE

As early as Cory, larger and pure white. This candidate which appeals to the shrewd market gardener as well as every owner of a home garden plot, comes from the State whose name it bears and whose latitude is an indication of earliness in all vegetables. It has a pure white cob with a rich cream white kernel, sweet and juicy. Shows none of the red shade like Cory or Marblehead when cooked for the table. A fine ear, of good size, stalk medium, and on good soil often bears two ears. It is the result of six years careful selection. Experienced gardeners and others who have grown it for the past two years find it the largest white first early sweet corn they have grown. **Price per bushel, $4.00.**

JACKSON WONDER BEAN.



This new Bean grows from two to three feet high, and might be termed a combination Bean, as the pods, when young, are excellent used as snap-beans. After the pods become filled, they are used as a shell bean, by cooking them and serving in the same manner as the well-known Lima Bean.

This plant is a beautiful sight to look upon as it stands densely loaded with foliage and its broad, flat pods, containing three to four beautifully colored flat beans, similar to the Lima in shape. They are rich, marrowy and fine flavored, nutritious and healthful. Their flavor is superior to the Lima.

IMMENSELY PRODUCTIVE,

And being early, is adapted to all localities where any other bean will grow. It continues to bloom and bear until killed by frost. This new Bean is sold only by packet this season. **Per packet, 25 cents.**

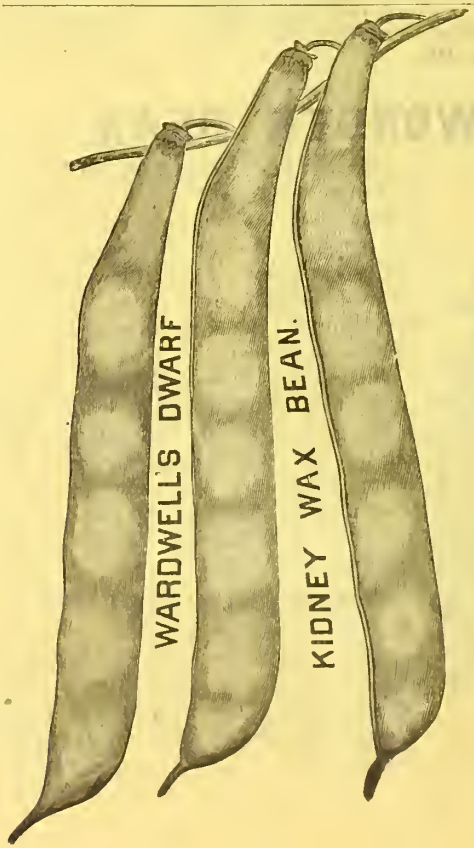
TELEPHONE PEA.

Garden Peas

Examine our list of garden peas, we have the finest stock ever in Syracuse, grown especially for our retail trade.

Mangles.

We import large quantities of Sugar Beet for making Sugar and Mangles for feeding, annually. Our prices will be found right. We quote special on large quantities.



WARDWELL'S

Kidney Wax.

—o—

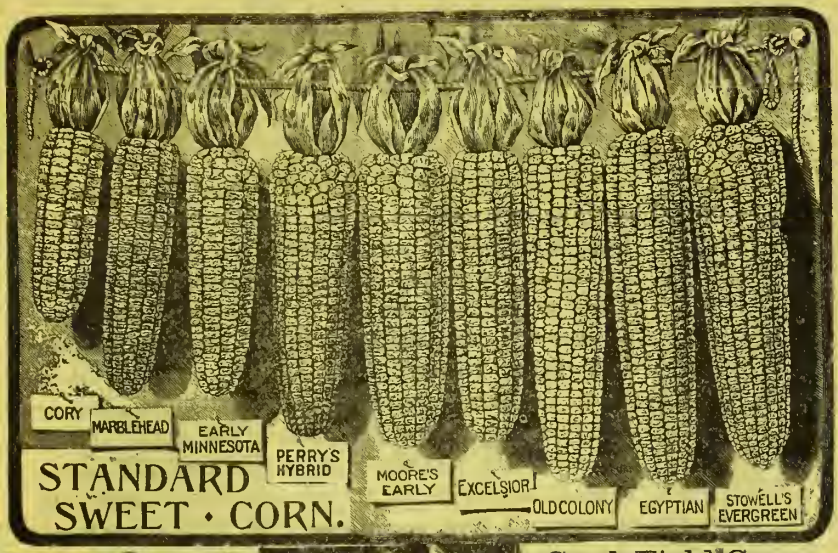
Vines of medium size, erect, hardy and productive.

Pods long, broad, flat and waxy yellow.

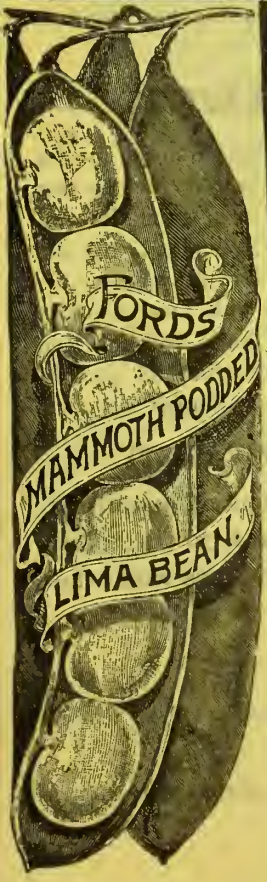
Are Entirely Stringless.

Beans white, with two shades of reddish purple more or less visible, and a distinct kidney shape.

Price 50 Cents per Quart.



Seed Field Corn.



CHOICE SELECTED

YELLOW GLOBE DANVERS

Examine our fine line of Cutlery.

Four Rowed Spring Rye.

Four Rowed Spring Rye.

Who ever saw Four Rowed Spring Rye? A few years ago we sold one of our customers some SPRING RYE and while it was heading out he discovered something peculiar in the shape of some of the heads, while nearly all were flat or two rowed there was occasionally one **square, long, very handsome and four rowed.** He selected carefully these square heads and has been growing them separately. The type seems to be well fixed. The grain has the appearance of common Spring Rye only differing in shape of head with double the kernels in each. We consider it a great acquisition. We have shown heads of this Four Rowed Rye to some of the best growers in the State and they pronounce it a

NEW VARIETY.

The culture of Spring Rye has been limited for the past ten years, partly owing to scarcity, or the low price of grain, but now the straw is in great demand and the sale of straw and grain together brings the crop as profitable as anything the farmer can grow.

Spring Rye is profitable to sow with Oats, you can get the average crop of Oats per acre, and the Rye growing so much taller does not obstruct its growth. hence you get the Rye extra. Every farmer

SHOULD TRY THE NEW VARIETY.

We offer it this year in limited quantities. 1 lb. package by mail, post paid, 30 cts.; 3 lbs, post paid, 75 cts. If sent by express with other seeds the cost of postage will be deducted.

———o———

We expect a fine crop of common Two Rowed Spring Rye at a nominal price.

For Pocket Cutlery, Scissors and Shears, call on us.

We offer this new Wax Bean grown by W H. GRINNELL, of Pierrepont Manor, N. Y., one of the most reliable seed growers in Northern New York. Of this new Wax Bean he says: "I consider this bean the earliest, most productive and decidedly more *free from rust* than any other variety of Wax Beans." We would recommend this Bean to every market gardener.

TRADE MARK

1000 Tons of it used with Safety to Man and Beast.

WHAT IS SLUG SHOT?

Slug Shot is an impalpable powder, a combination of insecticides, poisonous to insects preying upon vegetation, *and withal an excellent fertilizer*, affecting nearly all classes of insect life, so that they either die, or leave for parts unknown.

It Kills the Potato Bugs in all stages of their growth, *but not the eggs.*

It Kills the Black Fleas on Cabbage, Turnips, Beets, Radishes, and Egg Plants. Apply by dusting over the plant.

It Kills the Cabbage Worm and also the Currant and Gooseberry Worm. The Aphis or Green Fly on Roses and other Flowers.

Has Prevented the Ravages of the Curculio and Canker Worm on Fruit Trees; has likewise been used around Beans, Melons, Squash, &c., to the detriment of the ravages of the Cut Worms.

Keeps the Striped Bugs from all Vine Crops. For full information and testimonials from all sections of the United States, send stamp for the pamphlet: **"Hammond's Slug Shot and Its Uses."** Slug Shot is put up in tin canisters, 25 cents; also in 5 and 10 lb. bags, and in flour bbls. loose, that contains 235 lbs. each. It is applied by duster or bellows. The price for a five pound package, 30 cts.; ten pound package, 50 cts.; 100 lbs. 4½ cts.; full barrel, in bulk, 4 cts. per pound.

WE WILL MEET ANY PRICES GIVEN TO GRANGERS ON SAME CLASS OF GOODS.

Flower Seeds.

KEY TO CULTURE.

A. Sow for succession from April to June for summer and autumn blooming. Prepare the ground thoroughly by digging, adding a good supply of leaf-mould or well rotted manure, making the surface fine and smooth.

B. Sow in gentle heat, in a well-drained pot or pan of light soil. Sow thinly and cover lightly with a fine sandy soil. Shade from bright sunshine, and water when necessary through a fine rose watering pot. Transplant to open ground when all danger from frost is over. The seed may also be sown in a cold frame in April, or open border in the latter part of May but will not flower so early. Transplant or thin out before the plants get too large.

C. Sow from April to June or in August, in a well prepared bed of light soil, covering the seed lightly. Keep clear of weeds, and thin out the plants, if too thick, sufficiently early to allow them to develop their growth.

D. Sow in Spring in a well drained pot or well prepared hot-bed of light, peaty or sandy soil. Place in a moderately warm temperature. Shade from bright sunshine and keep moist, transplanting when ground is in proper condition, or in open ground after May 10 for late flowers.

E. Sow in open border in April or May, and thin out or transplant, giving each plant plenty of room.

F. Sow any time, in a pot prepared as follows: Let the pot be one-third full of drainage or broken charcoal; over that rough siftings of mould, and the surface with very fine soil, half of which should be composed of fine, sharp sand; water with fine sprinkler; scatter the seed thickly over the surface. covering very lightly; keep from direct rays of the sun. As soon as the plants show the third leaf transplant into seed pans, three-fourths of an inch apart, giving a little air to strengthen them. When the plants begin to touch each other they should be transplanted singly into small pots and keep them in a cool airy part of the greenhouse near the glass. Re-pot them when necessary.

The following portion of our catalogue, devoted to Flower Seeds, we have arranged both alphabetically and in columns, to enable any one to easily refer to the price and description of any variety desired.

KEY TO COLUMNS.

The 1st col. contains the name of the flower.
The 2d " " hardiness and duration.
The 3d " " height in feet.
The 4th " " color of flower.
The 5th column contains culture.
The 6th " " price per packet.
The 7th " " general observations.

NAME.	Hardiness and Duration.	Height. Feet.	Color of Flower.	Culture.	Per Pkt.	GENERAL OBSERVATIONS.
Aster, Truffaut's La Superbe	hA	2	pure wht.	D	10	**Aster.** No lover of these flowers can find anything so easily cultivated that would afford such genuine pleasure and satisfaction. The New Washington varieties are extremely beautiful, attaining a very large size averaging 4½ inches in diameter, and in delicacy of tints are unequalled. Aster seed should be sown early in the Spring in a hot-bed or window box and transplanted out-doors when the weather is warm, about 12 inches apart—the taller varieties a little farther apart and the dwarf varieties a little nearer together.

NEW AND DESIRABLE FLOWER SEEDS, ETC.,

Not in our Regular List.

Aquilegia Stuarti, "Extra." Flowers very large, four inches in diameter. 20 cts. per package.

Ageratum. Dwarf, new. 10 cts. per package.

Aster Comet. Colors various with long wavy petals full flower. 10 cts.

Aster, "Snowball." Pure white pompon shape flower, about 15 inches high. 20 cts. per package.

Harlequin Aster. Spotted and striped double, mixed. 25 cts. per package.

Mignon Aster. Pure white, small pompon flowers. 10 cts. per package.

New Victoria Aster. Mixed colors, tall, full flower, pyramidal shape. 10 cts.

Ball or Jewel Aster. Symmetrically incurved, the bloom a perfect ball. 25 cts. per package.

Calceolaria Hybrida Grandiflora. Extra fine greenhouse variety. 25 cts.

Ipomœa Noctiflora, Moon Flower, or Evening Glory should be sown as early as March and transplanted as soon as season will admit.

Ipomœa Noctiflora Hybrida. Black and white seeded, new. Said to open nearly one hour earlier in the evening, grows more rapidly than the above and flowers fully one inch larger in diameter, and handsomer in appearance every way.

Ipomopsis. A very beautiful plant, long spikes with scarlet and orange flowers, fine foliage, quite hardy, perennial, and suitable for dry situations.

Sweet Peas. Are very short crop this season ; the European crop almost an entire failure, the price will be necessarily higher.

Lathyrus Odoratus, "Sweet Peas." Imported by us annually.

" **Adonis.** Beautiful deep rose with wings almost carmine. 10 cts.
" **Apple Blossom.** Resembles the flower of apple blossoms very closely.
" **Boreatton.** Its flowers are a rich dark chestnut color. 10 cts.
" **Bronze Prince.** Rich chestnut color bronze Maroon. 10 cts.
" **Cardinal.** New, very beautiful. 10 cts. per package.
" **Crown Princess of Prussia.** Bright blush. 10 cts. per package.
" **Dutchess of Edinburg.** Autumn tints, variegated light scarlet, crimson tints, margined light. 10 cts. per package.
" **Imperial Blue.** Invincible blue, very fine. 10 cts. per package.
" **Imperial Black.** 10 cts. per package.
" **Indigo King.** "Purple Prince," very dark. 10 cts. per package.
" **Isa Eckford.** New, charming variety, flowers rosy pink shaded with carmine, creamy white. 10 cts. per package.
" **Orange Prince.** New, distinct and fine, rose colored wings and orange red standards.
" **Princess of Wales.** White with blue stripes. 10 cts. per pkge.
" **Queen of the Isles.** Mottled with white and purple. 10 cts.
" **Splendor.** Dark rose color shaded with crimson. 5 cts. per pkge.
" **Invincible Scarlet.** Striped fine. 5 cts. per package.
" " **Carmine.** New. 5 cts. per package.
" **Splendid Hybrid.** Mixed. 10 cts. per package.
" **The Blanche Ferry.** 10 cts. per package.

Mirabilis Longiflora or Jockey Club. Flower, very fragrant, similar to the perfumes whose name it bears, pure white, blooms from seed the first season until frost. Roots may be taken up and stored like Dahlias for the next season. 10 cts. per package.

Nicotiana Affinis. Pure white and very fragrant, *annual.* 10 cts. per pkge.

Primulas. "Carter's Holborn Prize," put up by the Carters in England, and sold by us in the original packages at 25 cts. each. Every package contains 12 different colors and shades.

Pyrethrum Roseum. Insect powder. 10 cts. per package.

Reseda Machet. Thick spikes with reddish flowers. 5 cts. per package.

Our mixture of Nasturtium Seed is the Finest in this country. Tall 10 cts. per oz. Dwarf 15 cts.

Tropæolum, "Nasturtium." Choice desirable named varieties.
" **Cloth of Gold.** Light foliage, dwarf. 5 cts. per package.
" **Empress of India.** Dwarf, dark leaved foliage. 5 cts.
" **Tricolor, (Jaratti) Grandiflora.** Dwarf. 5 cts. per pkge.
" **Asa Gray.** New, yellowish white, very fine. 5 cts.
" **Cardinal.** Dark scarlet, fine. 5 cts. per package.
" **Chaixianum.** Yellow, spotted with red, very fine. 5 cts.
" **Flammulun Grandiflorium.** Tall, scarlet and yellow extra fine 5 cts.

Zinnia, New Striped or Zebra Zinnias. Variegated pompon shaped flower. 10 cts. per package.
Zinnia Golden Yellow Striped Scarlet. 10 cts. per package.
Zinnia, Tom Thumb. New, dwarf, mixed, very double. 10 cts. per pkge.

TUBEROUS-ROOTED BEGONIAS.

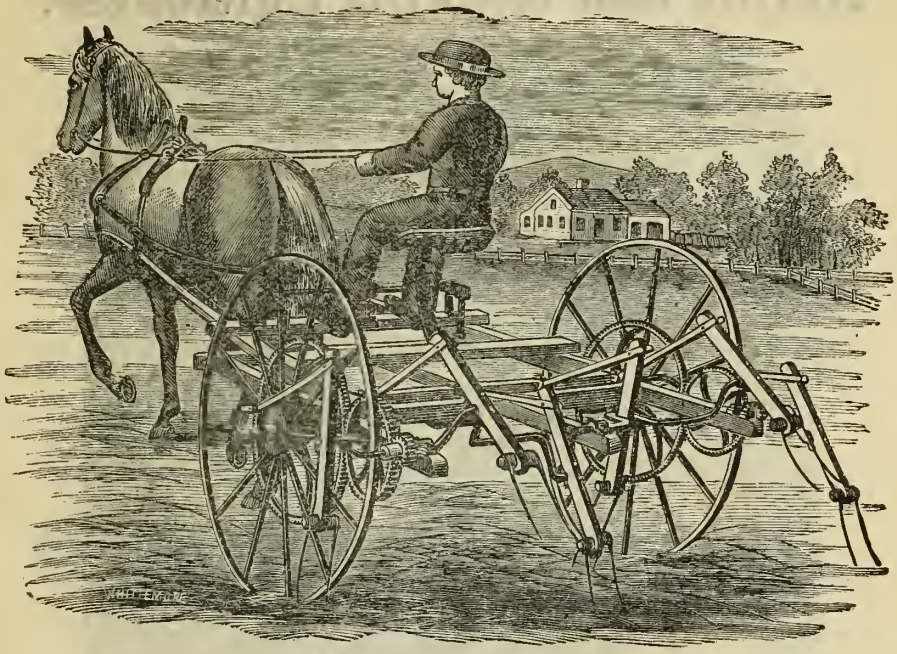
The Tuberous-Rooted Begonias are among the handsomest of our summer-flowering bulbs. They are not grown to the extent they should be, as they require no more care than Geraniums, have as fine a range of color, and will bloom continuously throughout the summer, even when Geraniums droop through lack of moisture and fail to unfold their flowers. Planted either in the rockery or flower border, they rival the Geraniums with their rich and varied colors, ranging from the most delicate shade of yellow and salmon to the most striking crimson and scarlet. We have no hesitation in saying they are destined to play a very important part in the bedding of the near future. They bloom profusely when planted out on rock-work or in the open ground, and are a decided attraction.

Single, in colors, Bright Scarlet, Orange Scarlet, Crimson Scarlet, Pink, White, Yellow, 25 cts. each, $2.50 per doz , $15.00 per 100. Mixed Single, 20 cts. each, $2.00 per doz. Double, in colors, 40 cts. each, $4.00 per doz.

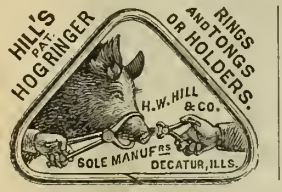
MIXED FLOWER SEEDS, FOR WILD GARDENS.

A splendid mixture of many varieties of beautiful free-blooming hardy flowers. Those who cannot give the constant care necessary for finely arranged flower beds will find the "Wild Garden" a delightful substitute, with its constant and ever-varying bloom. Such a flower bed is a continual surprise and pleasure, as new varieties and the old garden favorites, flower successively throughout the season. Price, per package, 10 cts.

BULLARD HAY TEDDER.



There is no investment a farmer makes that pays better than a **BULLARD HAY TEDDER.** Over twenty years in use and the first machines made still running. Belcher & Taylor are now making two sizes. *One* and *Two Horse*, with parts interchangeable. Price very much reduced. Give us your order early. We keep the extras always in stock.



Calf Weaner.

Lawn Seed, Special Lawn Dressing and Sheep Fertilizer

SHEEP FERTILIZER.

FOR PLANTS AND LAWN DRESSING.

QUICK, LASTING AND ECONOMICAL.

This is a Plant Food of great merit, carefully prepared with a view of supplying a Manure which shall contain all the elements necessary for the perfection of plant life. The ingredients have been so arranged that, while accelerating luxuriant growth, permanent benefits are secured by a continuance of nourishment to the plant. It is safe to use, and suitable for every purpose where a fertilizer is required. It is the only Manure we use on Lawns; it is absolutely free from foul seeds and a natural grass producer. **Price per 100 lbs. $3.50.**

OUR SPECIAL LAWN DRESSING.

For a lawn fertilizer that is cheaper than the Sheep Fertilizer we would recommend our Special Mixture of Lawn Dressing containing as it does valuable food for plant life, viz., pure ground Bone, Guano, Sheep Fertilizer, Tobacco Dust, &c., its value can be seen at once. It will give the grass a dark green color, acting very quickly and not fill the lawn full of foul weeds. If there are spots in your lawn where the grass dies out and has the appearance of the work of insects, use our Lawn dressing which contains Tobacco and is a sure cure as well as an excellent fertilizer. The above is all that is necessary for a perfect lawn after the *ground is well prepared* which should be done as long before sowing as possible

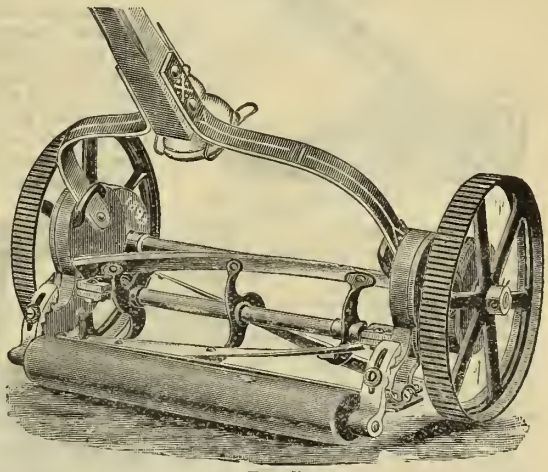
LAWN SEED.

We have only to refer to the *best Lawns of Syracuse* to show what we are doing to promote this good work in our midst. For years we have studied the nature of grasses, their adaption to soils, the time of maturing, height, color, &c., with this object in view. We use in our mixture only grasses that harmonize in color and size, using both early and late varieties, that our lawns may remain green and beautiful all through the season. We have reached the goal in this line and we are sure there is no better mixture for lawn than ours. In the first place we intend to have our *Lawn Seed strictly pure.* We examine every variety under a glass before we mix them, that our lawn seed may be free from foul weeds. We use all fibrous rooted perennial grasses so that they will stand the drouth and close cutting with the lawn mower without killing. We select grasses that harmonize in size in order to produce a fine velvety appearance and form a thick covering on the ground.

The reputation of our Lawn Seed extends throughout the country, and it is now used in many of the cemeteries, parks, public and private grounds in the State We put it up in quart packages with full directions for sowing on each package, or sell it in bulk as desired. If your groceryman does not keep it you can order it direct. Price per quart package **25** cents; per pound loose, **30** cents. One quart package will cover twenty feet square of new lawn.

We shall sell Lawn Mowers this Season at Prices regardless of Cost.

NEW EASY.



THE REX.

Lawn Mowers Cheap.

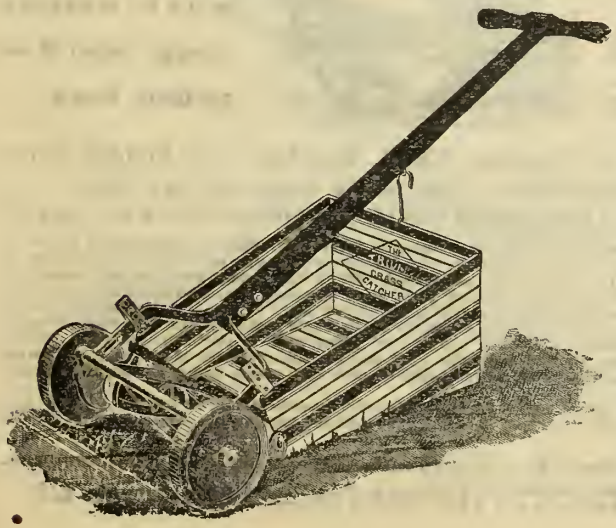
THE REX JR., "THE LION," NEW EASY, BAY STATE, GRANITE STATE, PHILADELPHIA and BOSTON. All warranted.

These are Lawn Mowers that will do good work, are durable and easy running, and will be sold for a very reasonable price. We will place one on your lawn in competition with any other named lawn mower, subject to the approval of the operator. *Satisfaction guaranteed or no sale.* Retail price as low as any first class Mower. Sharpening and repairing a specialty.

Border Shears, Grass Shears, Edging Knives, Weeders Dock Spuds, Weeding Trowels, Leaf Rakes.

THE TRIUMPH ADJUSTABLE GRASS CATCHER.

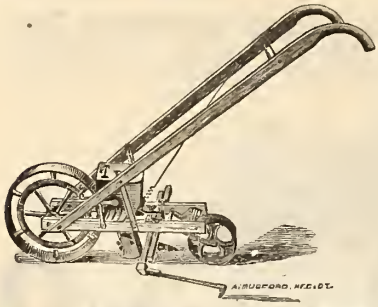
Patented November 8th, 1892.



Nothing succeeds like success.

This new invention has already become the favorite grass catcher with jobbers and retailers who sell them and the public who use them.

It is made of strong blue or brown striped canvas with a galvanized adjustable frame, adapted to any size of lawn mower. It is durable, constructed on correct mechanical principles, and is so arranged that the canvas cannot be cut by the sharp ends of wires, as the ends of the frame are enclosed in a small tight-fitting brass tube, only large enough for the wire to open and close the catcher, while the ends of the bottom wires are connected by a joint or eye to the main frame, making the whole strong and rigid. *No. 1 fits 10 to 18 inch machines, List* $1.25. *No. 2 fits 14 to 20 inch machines, List*, $1.50.



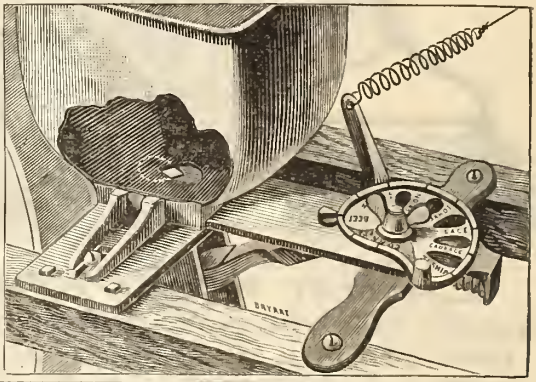
The New Model Seed Drill.

We place the New Model Drill at the head of the list because there is where it properly belongs. This Drill contains all the good points of every old drill in the market, with this point in addition: The slide or hole through the slide where all the seeds have to pass, is adjustable, and the slide can be changed to a fraction by the operator, thus admitting exactly the quantity of seed required. The hole is diamond shaped, as shown in cut below, which is another advantage for rough or irregular shaped seeds.

Price, $8.00

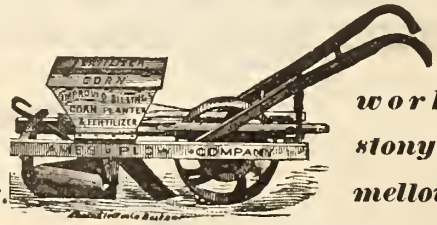
INDEX—As shown by enlarged cut the index or indicator is plain, convenient and reliable. It is placed in open sight, immediately under the eye of the operator, and as stated above, can be quickly adjusted to the slightest variation desired. As the names of the principal seeds are plainly shown on the index itself, it is not necessary to consult any table of references.

CUT-OFF—The flow of seed can be instantly stopped by a swinging cut-off, conveniently operated by a cord and ring on handle. This cut-off prevents all loss of seed at end of rows, and its swinging or gravity form will be found far preferable to one that slides under, as it cannot injure the falling seeds.



IMPROVED
BILLINGS PLANTER AND FERTILIZER.

Time Saved. Better Work. Quicker Results.



Perfect work whether stony, sward or mellow land.

Superior to all for Planting Field, Ensilage and Fodder Corn, Broom Corn, Beans and other Seeds of like size.

CAN ALSO BE ARRANGED FOR DROPPING BEET SEED.

This Planter has proved itself perfectly adapted to every requirement; durable and simple in construction; not liable to get out of order, and anyone can at once understand and manage it. It **performs work with certain and good effect on stony and sward land,** as well as on mellow intervale or other smooth land, thus asserting its superiority over all other planters. One horse is sufficient for draft, and seven to ten acres can be planted by one man in a day. The work can be done at once and when the ground is in best condition to receive the seed, and far better than is possible to plant by hand. The importance in the saving of time will be readily understood, and the superiority of the work done is substantiated by the fact that **corn planted by this machine** germinates much quicker and comes up much more uniformly than if planted by hand.

By a very simple but certain and unerring device, this machine may be gauged to drop any desired quantity of Seed or Fertilizer at a time, at equal and various distances apart, in hills or drills of uniform depth.

Size 18 in. wheel, plants 7, 14, 28, 56 inches apart, price all complete, $19.

The ALBANY PLANTER $16, with Fertilizer Attachments $18.

THE JEWEL

Is the Latest Hand Weeder with two wheels, and has all the Teeth Attachments necessary to do any kind of weeding.

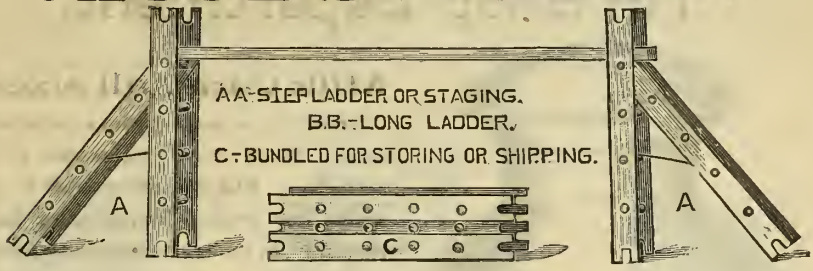
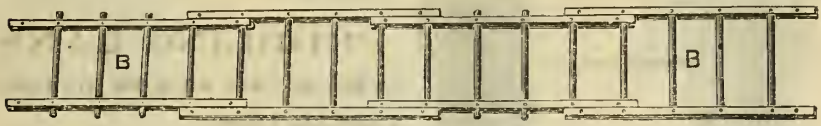
They can be worked by anyone who can run a wheelbarrow.

Price $6.00 to $8.00 each. We are Agents for this County.

JACOB'S LADDER!



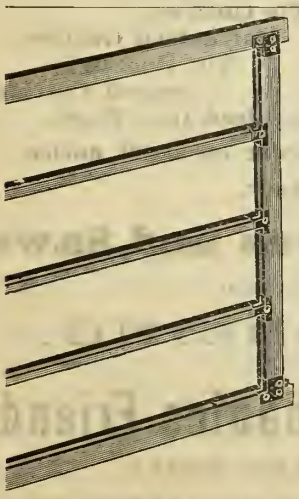


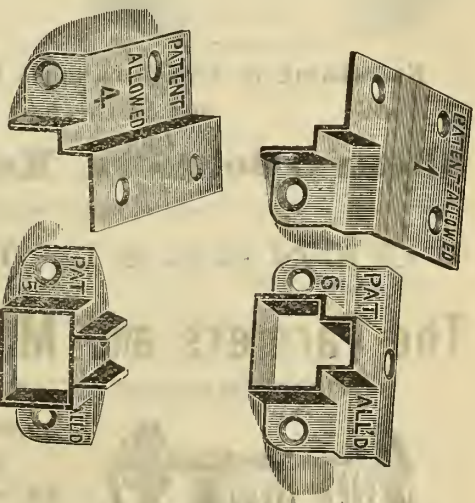
Jacob saw in his Dream a Ladder which extended from Earth to Heaven, but

JACOB'S EXTENSION OR SECTIONAL LADDER AND FIRE ESCAPE.

Is no dream, for any one who is wide-awake can see that this Ladder is one of the most complete articles ever invented for **Carpenters, Roofers, Paper Hangers, House Decorators, Merchants, Farmers** and **Mechanics** of all kinds. In fact, almost every one who is keeping house, or in any kind of business, will find this Ladder one of the most handy articles they ever owned. It is made in six foot sections, each one of which can be joined to the other in various shapes and forms, convenient for use. Five sections can be so adjusted as to make a 6-12-18-24 and 30 foot ladder, also a step ladder or staging from 1 to 12 feet high, and when not in use, it can all be stored in a very small space under cover, as shown in *cut C*. It is a well known fact that the ladders now in general use become so exposed to rain and weather, that when they are hastily required for fire or other purposes, they have become so decayed that many accidents to life and property occur from their use.

THE GARDENER'S HOT BED SASH.



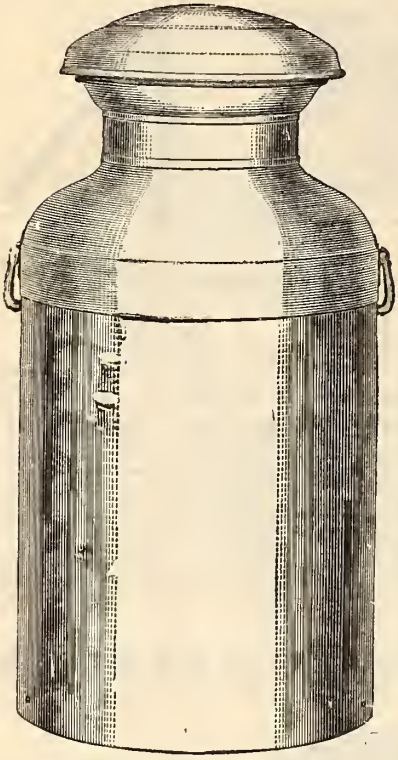


USED BY THE LEADING HORTICULTURISTS OF THE COUNTRY.

These Sash are made of **Clear Cypress** lumber, and braced with malleable iron or steel plates. They have no mortises or tenons, and consequently no places to hold water and rot. They are stiffer than any other sash, and do not become racked by constant handling. They are practically indestructible and **you** can not afford to use any other.

Price per dozen, $18.00 Sample Sash, $2.00

Tin Shop Department.



Milk Cans, all sizes.

Every Can is made by an experienced man. Every cover warranted to fit perfectly. Milkmen are invited to examine our work. Repairing done promptly, in the best manner, at a moderate price.

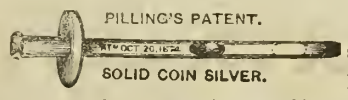
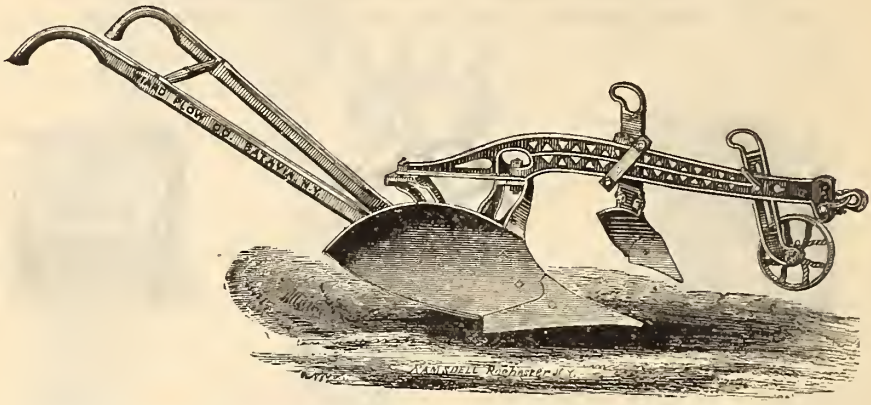
Milking Tubes



For Sore and Obstructed Teats and Hard Milking Cows

DIRECTIONS—The long rounded end of the tube is inserted in the orifice of teat, when the milk will flow without the use of the hands. It is best to wet the Tube with a drop of milk or water before using Remove the Tube when milk ceases to flow. If in some cases, the obstruction is further up the teat than can be passed by the regular length you should have a longer tube, and as it can be made any length, answers for all purposes.

Wiard and Munnsville Celebrated Plows.



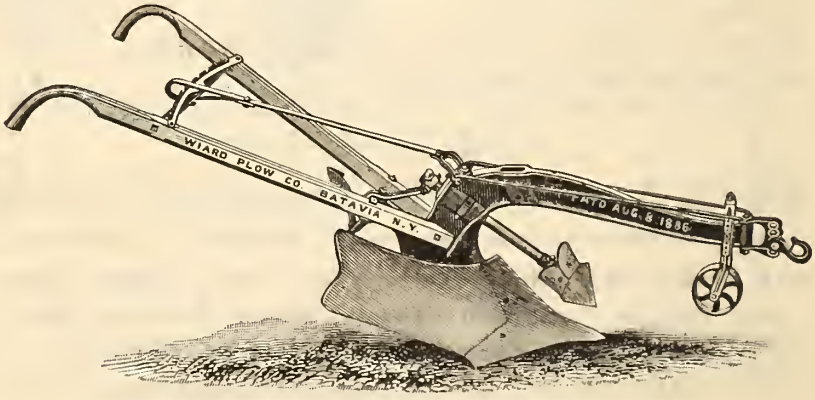
WIARD'S PATENT ADJUSTABLE MALLEABLE IRON BEAM CHILLED PLOW.

Centre Draft, Right Hand.

We have sold their make of Plows for years with great success; we carry in stock some ten sizes to suit all kinds of soil. We warrant each plow to do first class work when properly adjusted.

THE WIARD SWIVEL PLOW

WITH AUTOMATIC COLTER.



The Best Plow in the World for hillside or flat land and for cutting roots, or use in rough or stony ground. *The Coulter is made of Steel*, is adjustable in height, is easily kept sharp for cutting grass or other roots; draws easier than any other plow made and costs no more than if rigged with Jointer. *We speak of this* more especially for the reason that, wherever known, this Automatic Colter has given most perfect satisfaction, and our orders for it are much larger than ever before. *Whoever has a Wiard Swivel Plow* with Automatic Colter and adjustable Clevis, needs no other Plow for any work on the farm.

PLOWS AND PLOW CASTINGS.

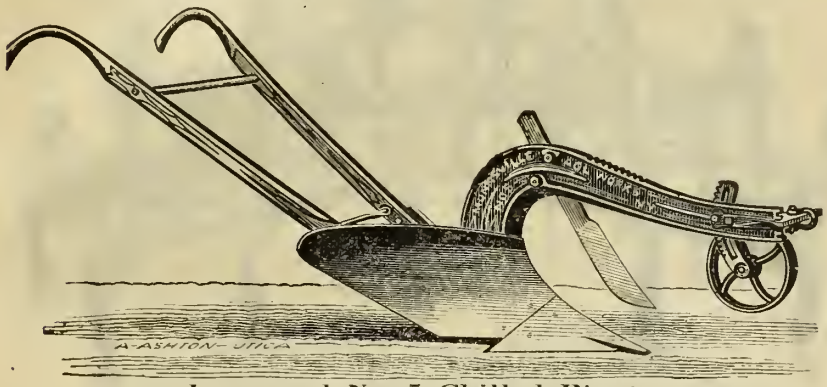
We are now carrying the largest line of Plows and Plow Castings that can be found in Syracuse. We can supply parts for nearly every Plow in use in this county. If you have an old favorite Plow and want parts, call on us. If you wish to change and get the best running Plow you ever saw, call on us, we can suit any kind of soil. If you are not sure of the name or number of your Plow that parts are wanted for, bring along the old part and we can fit you out with Wiard, Munnsville, Phelps, Dutton, Syracuse, Robinson, &c. Prices reasonable. Half dozen lots special price.

MUNNSVILLE PLOWS.

LATEST IMPROVED SEPARATE SHIN PIECE.

No. 59 Chilled, Leads Them All.

Separate Shin Piece Jointers will not Clog. Light draft and bound to clean in any soil. Our Adjustabe Jointer will not add to the draft. Furnished with Coulter or Jointer at the same price. Unequalled in hard or stony ground.

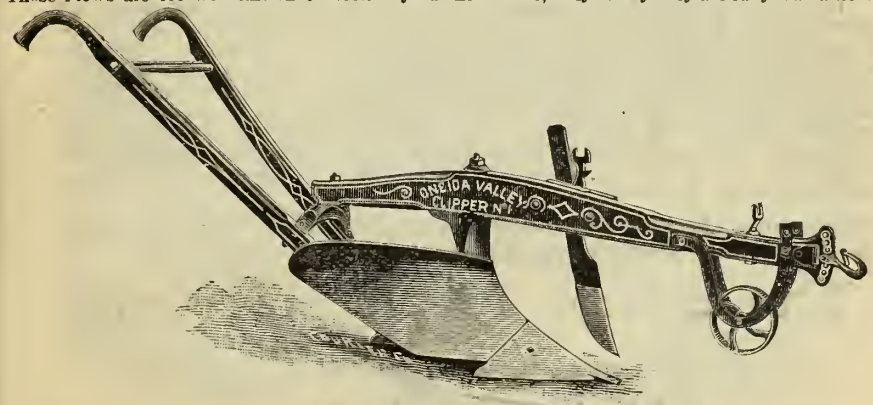


Improved No. 5 Chilled Plow.

We keep in stock a full line of **Munnsville Plows** as follows:

No. 5, Chilled and Steel, Iron Beam; No. 59, Chilled, Iron Beam; No. 8½, Excelsior, Wood Beam; No. 9, Excelsior, Wood Beam; No. 2½ Chilled and Steel, one Horse, Wood Beam; No. 21 Peekskill, Chilled, Wood Beam; No. 1, 2, 2½ Oneida Valley Clipper, Steel Plow, Wood Beam.

These Plows are too well known to need any further notice, only to say they are fully warranted.



Oneida Valley Clipper, No. 1.

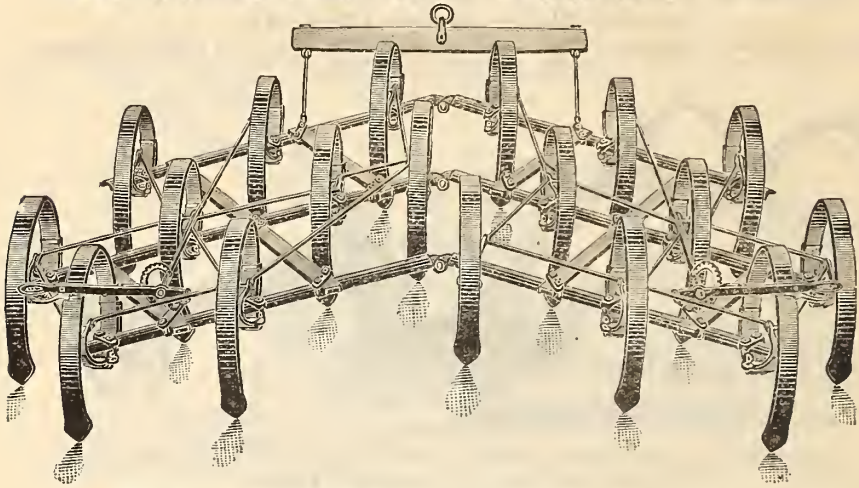
HALLOCK'S POTATO DIGGER.

The diggers competed at the potato-digging contest, open for all comers, at Mr. McCurdy's farm, at New Brunswick, N. J., viz: the Triumph, the Hoover, and the Hallock. At its close a vote was taken among the farmers present and the result was, four for the Hoover, six for the Triumph, and nineteen for the Hallock. As a result of the trial, we purchased one for our own use and find it superior, in the less power required and thoroughness of work done, to either the Allen or Common Sense digger which we had previously used; indeed, where the ground is cleared from weeds and vines, there is no necessity of digging after it, as the harrow will bring to light all that are not thrown out on the surface. Where the land is very weedy or the vines are green, we unhook the two wings and lay them aside. We find the Hallock a great labor-saver. It throws the potatoes on the surface entirely free from cuts or wounds of any kind.

Mr. P. B. Conets, of Flint, Mich., writes: "I have dug 10,000 bushels with the one purchased, and can turn out 500 bushels a day with five men. I would not take $50 for it if I could not get another. I have had most all other diggers, costing from $90 to $1.25, but I would sooner have yours even at the highest price."

Price, $18

NEW LEVER HARROW.



TEETH ADJUSTED FOR ORDINARY WORK.

The above is a cut of the CHILD & JONES *new all steel frame Lever Harrow*, fully warranted by us to do the best of work. Draft light, cleans readily; for wear and service it has no equal.

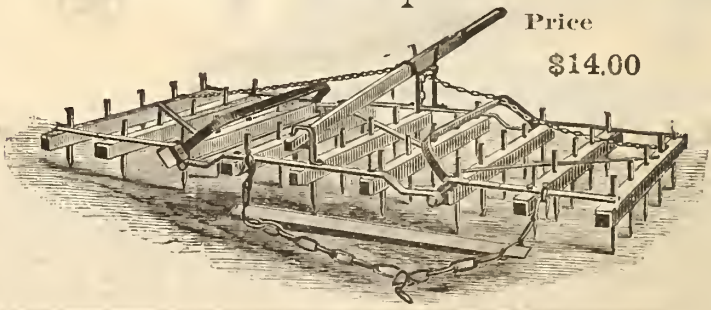
The teeth are fastened on the under side of the draft bars, and not at the intersection of the cross bars of the Harrow Frame which gives the advantage of clearing itself readily, and produces the lightest draft possible The teeth being held and adjusted by the clamps, gives all the necessary adjustment required to obtain all the wear and service there is in the teeth of any Spring Tooth Harrow. This description applies to the main frame and construction of our Lever Harrow, and it is the same as we have used on our regular harrows for years, which has proved itself to be the strongest and best Spring Tooth Harrow Frame in the world. It will do more difficult kinds of work, and do it better than any tool in the world.

Smoothing Harrows, Wood Frame Tooth Harrows, Wheel and other Harrows, Mann's Seeder and Harrow combined.

The Evans Triple Harrow.

Price

$14.00



The Great Cutaway Spading and Pulverizing Harrow,

PRACTICAL SUGGESTIONS ON TILING.

In having a tile drain it is well to strictly adhere to the following rules:

1. The drain should have a sufficient outlet for the discharge of all the water that may pass through it.

2. The drain should be deep enough to drain the widest space possible—from three to four feet—and deeper if necessary to get the water out by a much shorter line; but drain anyway, even if you cannot get outlet to drain so deep.

3. The bottom of the drain should be one regular line of descent, so that the current may have a smooth flow from the head to the mouth of the drain.

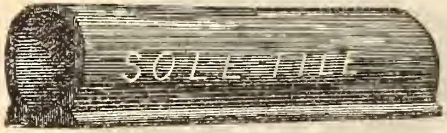
4. In laying the tile take pains to fit the joints closely, as with all care there will be sufficient space for the inlet of the water, and close joints will prevent the letting in of silt or washings.

5. At the junction of the drains the water should be brought together flowing as near as possible in the same direction, so that the flow of the current may not be obstructed.

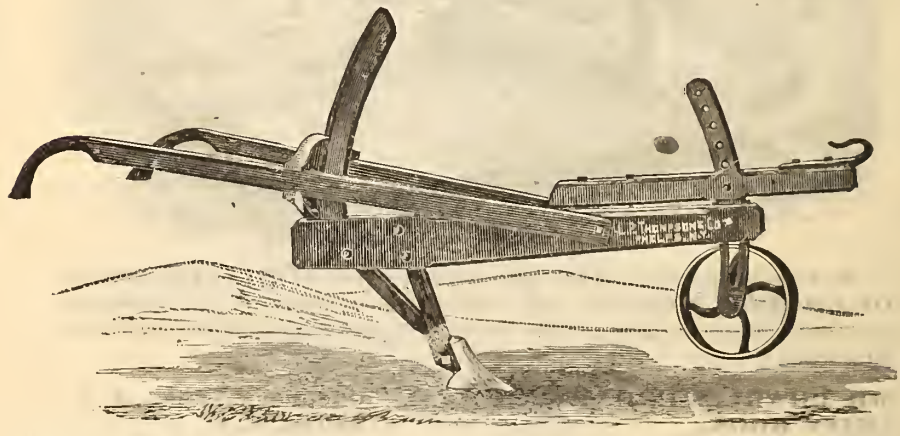
6. The size of the tile may be pretty accurately determined by the amount of surface to be drained and the descent of the drain.

7. If the drain be laid at a distance of 40 feet apart, 64 rods of tile are required to lay one acre; if at a distance of 50 feet apart 52 rods and a fraction will be required, and at a distance of 50 feet apart, 44 rods.

The distance that a drain will draw water on the sides is from 30 to 100 feet, depending upon the depth of the drain and character of the soil.



DITCHING PLOW.



We have secured for our farmers in Central New York a very low priced Ditching Plow, one that has both handles and draw hook adjustable and can be changed, "as you see," very rapidly, plowing to the depth of four feet. The ditches can be made with this plow at a cost of from 10 to 12 cents per rod. Hugh Oliver, of Marcellus, N. Y., now using one of these Plows, says he would not be deprived of it for $50. It is just the Plow for Ditching. Price of Plow complete, $10.00.

POULTRY SUPPLIES.

PRICE LIST.

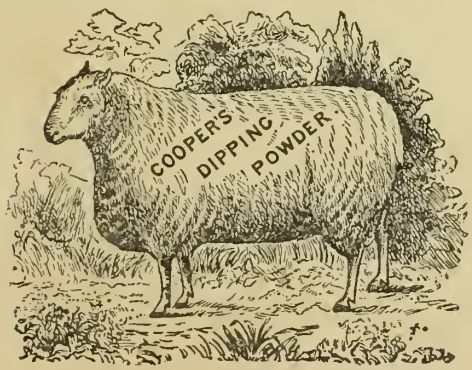
For a Bracing Tonic in Winter,

And one that will in a measure guard against roup, it is only necessary to add to the water a few drops of a solution of sulphate of iron (green vitrol) to give it a slight mineral taste. The water will assume a rusty appearance, but this is quite immaterial.

It's a Hen's Natural Business to Lay Eggs,

And a good many of them; if she does not it is because nature is hindered. Now in nature hens get much green food, insect food and some meat, and if we would have them at their best for laying when eggs are high-priced, then we must see to it that this part of the diet is all right.



WE SELL THE

Cooper's Sheep Dipping Powder,

the finest in America, used by all the *Ranchmen* in the west, sure cure for Scab and Ticks. We could show you a list of testimonials a yard long if necessary, but I think the one we add from, a firm so well known among Sheepmen will be all that is required to convince you we have the best. Sold at Factory price, $2 a package. One package will make 100 gallons for use.

SAN ANGELO, TEXAS, June 9th, 1891.

We hereby certify that we have dipped this spring twenty thousand head of sheep with **Cooper's Sheep Dipping Powder,** and the result so far has been, no appearance of scab; in fact the scab seems cured. We also state with pleasure that we have no losses resulting from the dipping either in grown sheep or lambs, except three head of lambs. We cheerfully recommend the COOPER DIP to all sheepmen.
